About This Game

Suit up, boys! The battleground is open and danger has never been more real. Enemies lurk at every turn, their trigger fingers just itching for the opportunity to take you out. Once the mask drops, be ready to pull the trigger.

Masked Shooters 2 puts you on the front line of a dangerous gunfight that can only end in victory or defeat; there will be no white flags to wave. As a covert ops soldier, you have access to advanced weapons that will blow your enemies away, if you know how to use them. From a pistol and sniper rifle to a grenade launcher and RPG, your arsenal is packed for a maximum kill rate, but it won't be easy. Enemies have their own weaponry and your ammo is limited, so make every bullet count.

From detailed graphics to life-like sound, this first person shooter game has everything you need if you enjoy adrenaline pumping, fast-paced gameplay. Choose to join a team or show off your sniping skills in free for all mode, where it's you against the world. You can play offline against pitiless AI soldiers or join a room online to play against others in real time for a true test of your skill. There's only one answer in Masked Shooters: it's time to lock and load.

highly recommended for Real Time Strategy seekers. Very good hero!. This is very much a first-impression review. The game just couldn't get me interested for longer.

It's a slow-paced and rather boring puzzle game, gating a slow-paced and rather boring storyline.

I am also not a fan of some of the art design. The pond, where you'll spend most of your time, just isn't easy on the eyes. Nor are the kimono with shifting patterns that many characters wear.. Worst Pixel Puzzle game by far. Great game and thanks for story about friendships

. I was holding off my review till the developer fixed the problem, mentioned in the other reviews, which they did. On inspection it looks great, and it brings nostalgia of days with RPG Maker 2000/2003 where I would try to make an epic story! I can bring back some old character ideas from my previous unpublished works. I'm pretty stoked.

Wasn't worth the trouble, but, meh. I didn't truly notice what was missing until the day before the fix so who am I to complain.

I am merely reviewing to clarify it has been fixed, for those who want to buy it.. this is a very cool puzzle game! but i do not recommend you buy this game if you own a potato pc like me. Therefore, i can not give a thumbs up.

I'm still pretty early on into the game but I must say, I'm certainly very impressed with the game. Especailly for the price you get it for. It has a lot of voice work and the writing so far has been pretty enjoyable. The battle system looks simple but there are a lot of deeper mechanics that have slowly been introduced as the game goes on. I'd say pick it up if you want a nice JRPG experiance. I will update my review once I finish it but I think I will still like it.. Simple idea, decent implementation. Looking forward to co-op and competitive multiplayer. Controls feel rough for Oculus. Had to make myself smaller in order to feel comfortable standing in front of the loading area. Aside from that, it's a great start to a casual VR experience.. This game is sweet, cute, and fun! You guide or heroine through her new life as an artist-for-hire. It isn't really like Harvest Moon or Stardew Valley at all. There is no time limit or even a time component at all really, you go through the days of the week but the months are not even seperated. That's a good thing is this game's case - the pretty artwork along with the really sweet music make this one of the most relaxing games I've played in months!. I actually think that off all the zup games this one is the most interesting with the puzzles it uses. It's like a love poem to the creators of most games ever made.

You thought the entire time you were playing some first person exploration game with hand-holding puzzles to solve in some uninspired RE7-like home. Foolish you, the creator just wanted you to think that, before it drew the curtain and ate your soul.

<https://www.youtube.com/watch?v=7HtMYnYwmH8>. This is a great game to play for an hour or two at a time. It's a mix of a shooter and tower defender, storyline is quite short, I find the final mission quite enjoyable and the challenges will keep you occupied for quite some time. You can always try the demo first if you're not sure about buying it, certainly worth the ten bucks since it's packed with action. Only on the first level and couldn't do it due to my room being too small. I really hope they add a teleprt feture for those of us without massize rooms. Despite this what i played was really fun and i would recomend it to anyone who likes somlive puzzles.

P.S. Please release a teleport even if its optinal so as to not ruin the experiance for people with bigger rooms :)
. This Dlc is worth the money. But in game its a pricy machine, so make shure you save up for it.. Check out my review of this DLC here:

<https://youtu.be/VldYWVKNDTV0>. This is really pretty fun and funny. Lot of bullet dodging, without a game controller, but otherwise, good quality game. Good music, super graphical effects, and interesting gameplay idea. I just started playing, but I can tell the campaign is going to be pretty nifty. I recommend watching a gameplay video for a couple minutes, because this game might be a bit too slow for some. Otherwise, no problems on ubuntu linux 16.04 with radeon mesa drivers. Unity engine.

[After a while of playing, I really don't know what to make of the game. The ship controls are awful clunky, and while I really like the idea here, I am not sure that the gameplay matches the style. I also had trouble playing this on my laptop, as that video resolution is oddly not supported.](#)

HYPER *Gods*

And we're live! As promised, we've just released the newest update for Hyper Gods, the Patch Notes of which are below. Remember that we temporarily blocked the multiplayer modes and fully implemented a Singleplayer mode.

We sincerely hope you enjoy this update. Happy shooting!

Hyper Gods ver. 0.5.0 Patch notes. **V1.1 Beta Update:**

Amongst the major performance improvements in the recent 1.1 patch, we've noted some emergent issues with the new Unity update (and potential crossover with Nvidia drivers and SteamVR itself), so we are going to shelve this latest update into our beta branch until we get more feedback.

If you're interested in trying it, please feel free to give it a shot and offer us feedback on the user forums.

Thanks as always for your incredible support and feedback!

Immortals!

A demon army invasion is starting! The enemy's first troops have already materialized on the planet. With time there will be more and more of these disgusting creatures. Junior gods will be faced with new challenges and dangers, they will have to repel attacks in the regions, defeat new distortion generals and for the first time ever fight Nihaz, the previously unknown avatar of the demon army's great god.

The start of the tenth season brings junior gods new bonuses in Flavius's Laboratory, and greater available might in the bastions. You can now get up to 27000 points of Might from one structure. New difficulties for group adventures will be gradually unlocked. To defeat all the demon leaders, you will need the latest and most powerful weapons so junior gods will have to acquire tenth generation equipment.

Invasions in regions. **Dark Castle Artwork:**
